Apparently the POL-892 that was sent out with the first office action was blank. Accordingly, a new POL-892 that is properly filled out is attached with this office action to correct that inadvertent error.

Due to the presentation by applicant of new claims with a new breadth of scope and the presentation of amended claims with a breadth of scope broader than suggested by the claims that were objected to the examiner, the examiner has found that upon closer inspection, the Klinger reference may be read more broadly than was previously found. Accordingly, the indication of allowability previously set forth by the examiner is hereby withdrawn.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Klinger.

Klinger shows a clip release tool having a handle 11 and a head member 12 having a slot 45. The head portion includes a first portion 41,42 and a second portion 20-23. The handle 11 is coupled to the first portion 41,42. Figure 4 of Klinger shows a tapered portion between the first and second portions. The head member is seen to be capable of engaging a brake cable clip and the slot is seen to be capable of receiving a brake cable inasmuch as brake cables and brake cable clips are available in a wide range of sizes.
